Call for Tutorials at IJCB 2017

The organizing committee is pleased to invite tutorial proposals for the International Joint Conference on Biometrics (IJCB'2017). Tutorials can be for either half- or full day. Tutorials will be held on October 1st, 2017 in Denver, a day before the main conference begins. Tutorial proposals can address either emerging or established research topics that will be of broad interest to the biometrics community. Tutorials are expected to offer an opportunity for IJCB'2017 participants to acquire technical knowledge in emerging and/or established research areas in biometrics. Any area of biometrics can be the subject of a tutorial, and examples of past tutorials include:

- Iris Recognition: Fundamentals to Future Topics
- Advances in Mobile and Remote Biometrics
- Soft Biometrics: Algorithms and Applications
- Deep Learning for Biometrics
- Latent Fingerprint and Palmprint Recognition
- Metric Learning for Face Analysis
- Iris Recognition: From Basics to Research Frontiers
- System Design and Performance Assessment: A Biometric Menagerie Perspective

Tutorial proposals will be prioritized and evaluated based on their relevance to the conference, originality, qualification of the tutors on the proposed topic, and their potential to attract participants to the conference. Tutorial proposals should contain the following information;

(1) title;
(2) abstract;
(3) target participants;
(4) prerequisites for the participants,
(5) expected enrollment along with the basis of such enrollment,
(6) list of topics to be presented with their estimated duration and pointers to the associated literature and
(7) short biography of the tutor with relevant experience on the tutorial topic.

Tutorial proposals should be submitted as a PDF attachment via email to the tutorial chair: Scott McCloskey (scott@cim.mcgill.ca) with the subject title "IJCB 2017 – Tutorial Proposal".

Important Dates for Tutorials:
Tutorial proposal submission deadline: July 31, 2017
Acceptance notification: August 15, 2017
Tutorial date: October 1, 2017

About IJCB 2017: International Joint Conference on Biometrics
October 1 - 4, 2017, Denver, Colorado, USA

The International Joint Conference on Biometrics (IJCB 2017) combines two major biometrics research annual conferences, the Biometrics Theory, Applications and Systems (BTAS) conference and the International Conference on Biometrics (ICB). The blending of these two conferences in 2017 is through special agreement between the IEEE Biometrics Council and the IAPR TC-4, and presents an exciting event for the entire worldwide biometrics research community. This is the third such joint conference, following IJCB 2014 in Clearwater Florida and the first IJCB 2011 in Washington DC. This conference is a result of major worldwide consensus to join the two major biometrics meetings and to establish IJCB as a venue for presenting biometrics research results of highest quality.
